Title	Plugging into the Future: An Exploration of Electricity Consumption Patterns Using Tableau

Web Integration Using Flask

To integrate Tableau dashboards and stories into a web application, Flask (a lightweight Python web framework) was used. The Tableau visualizations published on Tableau Public were embedded into an HTML page and rendered using Flask.

|       └── index.html
```

Description of Project Files

app.py

This file serves as the main Flask application. It handles routing and renders the HTML template that contains the embedded Tableau dashboards and story.

templates/index.html

This HTML file contains the embedded Tableau Public dashboards and story visualizations using Tableau's embed code. It is responsible for displaying interactive visual analytics on the web page.
